GrokkyAiTM

The world's first conversational benefits agent

Real Talk. Real Answers. Real Results.

What Grokky Is:

Your conversational benefits agent that lives on the Grokker platform and chats with your employees about their health and benefits, in everyday language, no jargon allowed. No complex terminology, just clear communication.

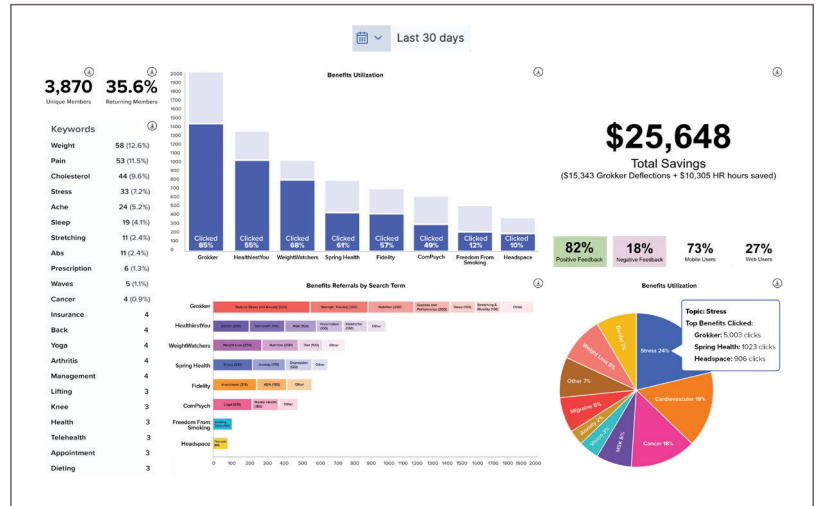

How It Works:

When an employee types, "How can I save for retirement?" Grokky replies with a personalized plan that scales from lowest to highest acuity:

- A visually immersive video resource (like "The 5-Minute Stress Reset")
- An expert-led program recommendation (such as "Stress-less Survival Guide")
- A direct link to their existing EAP benefit for additional support when needed

Valuable Insights for Leadership:

Behind the scenes, Grokky gives you anonymous analytics on employee concerns and what benefits they're actually using, giving you actionable intelligence to optimize your wellness offerings.

Why It's Revolutionary:

Eliminates the guesswork in benefits planning with real-time employee need tracking

Reduces HR workload by independently handling common benefit inquiries

Delivers instant answers to employee health questions without the hassle

Creates a streamlined experience where employees can access all benefits in one place

Provides in-depth engagement reporting so you can see what benefits are truly being utilized
